### Public photographic spheres

"In my curatorial work (...), I have used the notion of "public photographic sphere" in order to categorize both a specific understanding of the photographic object and a specific historiographic and museal approach to it. In this talk I expose and bring to discussion (...) various overlapping meanings (poetic, historical and political) of this notion. (...) The exhibition space and the museum seem to me the place still today for a debate on the current and changing conditions of the meaning of the democratic public sphere."
